

## Establish your Company in India

We provide incorporation services in India for foreign clients by working with established Indian Chartered Accountants and Company Secretaries. By coordinating the registration activities in India and simultaneously advising clients, we provide full transparency and also ensure that we follow the governing and regulating laws in India (Companies Registration Act, 1956, Ministry of Corporate Affairs).

MARKET ENTRANCE

### Advantages of an Indian Company

Foreign companies, including SMEs, often realize that incorporating their business is one of the best ways to obtain full ownership and control over their business venture. Incorporating a company in India reduces liabilities on the foreign firm, since the Indian Pvt. Ltd. Company acts as the sole-entity in the Indian market. We support clients during, but also **after**, incorporation by establishing internal financial audits, reporting systems, opening bank accounts, fiscal planning and co-drafting employment and/or lease contracts.

#### Registering Company Name

The Registration Procedure starts with the filing of the name application with the RoC (Indian Registrar of Companies).

#### Appointing Shareholders and Directors

Minimum two directors and two shareholders required. Companies must comply with Director requirements as per the Companies Act, 2013. Directors must obtain Director Identification Numbers (DIN). At least one director must have a Digital Signature Certificate (DSC).

#### AoA and MoU

To get the company name approved, Memorandum of Association (MoA) and Articles of Association (AoA) have to be finalised. After this, compulsory stamp duties have to be paid to the government

Once all the documents are ready, they are filed with the Registrar of Companies (RoC) and the Certificate of Incorporation is issued. In India, companies can be incorporated even with 100% foreign ownership.
